

Sanda Citizens' Policy Charter

We, the proud citizens of Sanda, establish this charter as a declaration of our resolve to create a city where people and nature flourish side by side.

We shall:

- forge a considerate and supportive community where people come to each other's aid and where human life and individual rights are respected
- foster an environment full of hope in which each citizen can live a healthy, joyful life
- preserve and protect Sanda's scenic beauty to develop a city where all citizens live in close contact with nature
- cherish our old traditions and culture even as we create new traditions together
- treasure and protect the bounties of our agricultural heritage while encouraging development for a vibrant future
